

COMMODORE CONFIDENTIAL

August 30, 1991

TO: All Engineering Personnel

SUBJECT: Major Demonstrations and Accomplishments this Week

REFERENCE: Recent DEMO's

You can all be proud of the recent tangible results of the hard work which the "team" has contributed over the past few months (and years).

On Wednesday, August 28th, we successfully demonstrated to Medhi Ali an A300HD and a Slim Line replacement product. BOTH of these were extremely well received.

On Thursday, August 29th, I had the opportunity of a DEMO of the new AA Chips in a "revised" A3000. The visual output was OUTSTANDING! Clearly we must put this into our product line rapidly (without impact to our current commitments).

I know the entire team is proud of these (and other) accomplishments. We now must continue to execute to our plan and bring these exciting products to market in a timely manner. We'll review our current status at the next area meeting in mid-September.

THANKS!

Bill
